

Multiplying

$$\diamond \times \text{hexagon} = \square$$

$$\circ \times \triangle = \square$$

$$\text{pentagon} \times \diamond = \square$$

$$\text{hexagon} \times \triangle = \square$$

$$\diamond \times \triangle = \square$$

$$\circ \times \triangle = \square$$

$$\text{hexagon} \times \triangle = \square$$

$$\circ \times \triangle = \square$$

$$\diamond \times \text{hexagon} = \square$$

$$\diamond \times \triangle = \square$$

$$\text{pentagon} \times \diamond = \square$$

$$\circ \times \triangle = \square$$

Write two multiplications for each set of stickers.

ACTION Build each array from cubes and turn it around.

THINK Which numbers between 10 and 20 cannot be made with 2 or more rows of stickers?
