

# Wkansday

## Divide 2-digit by 1-digit (1)

There are 84 pencils to be shared equally into 4 pots.

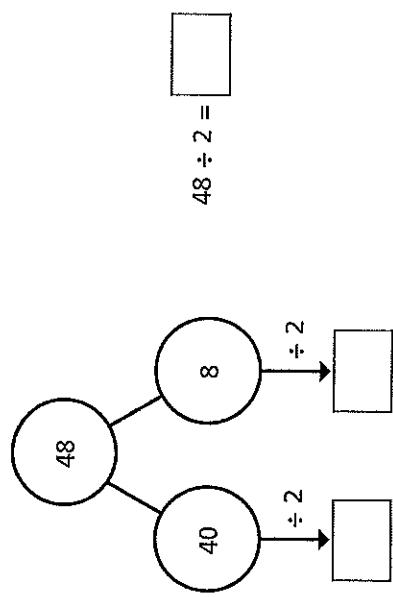

- a) Draw the pencils on the place value chart to show how they are shared.

Tens	Ones

Amir solves  $48 \div 2$  on a place value chart.

Tens	Ones
2	4
1	8

Complete the part-whole model to show what Amir has done.

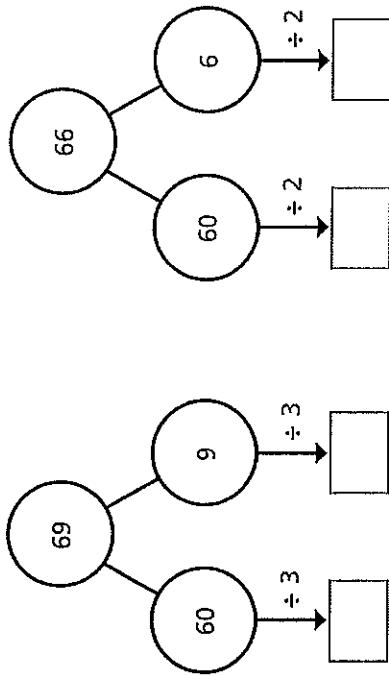

$$48 \div 2 = \boxed{\quad}$$

Work out the divisions.

a)  $69 \div 3 = \boxed{\quad}$

b)  $66 \div 2 = \boxed{\quad}$

- b) Complete the number sentences.

$$8 \text{ tens} \div 4 = \boxed{\quad} \text{ tens}$$

$$4 \text{ ones} \div 4 = \boxed{\quad} \text{ one}$$

$$84 \div 4 = \boxed{\quad}$$

- c) How many pencils are in each pot?

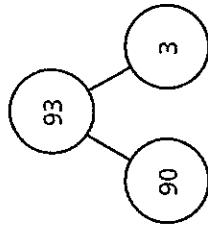

Use a place value chart to work out the calculations.

a)  $39 \div 3 = \boxed{\quad}$

b)  $68 \div 2 = \boxed{\quad}$

**5** Work out the divisions.

a)  $93 \div 3 = \boxed{\phantom{00}}$

b)  $82 \div 2 = \boxed{\phantom{00}}$

**6**

88 can be divided equally by 2 and by 4

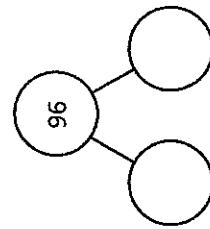

Do you agree with Annie? \_\_\_\_\_

Explain why.

$$96 \div 3 = \boxed{\phantom{00}}$$

$$84 \div 2 = \boxed{\phantom{00}}$$

$$99 \div 3 = \boxed{\phantom{00}}$$

**7** Esther has 2 jars of mints.

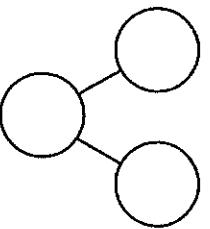

Esther shares the mints equally between 3 bowls.

How many mints are in each bowl?

$$86 \div 2 = \boxed{\phantom{00}}$$

$$98 \div 2 = \boxed{\phantom{00}}$$

There are \_\_\_\_\_ mints in each bowl.

How many different ways can you work out the answer?

What do you notice?
